Water Efficiency Tips!!

With the recent hot weather and lower than predicted rainfall this summer, it's important to use water wisely....

Find some of our [Top Tips](#) for saving water during the current heatwave:

Did you know?

You could save as much as 32 litres of water from a quick shower instead of a bath!

Did you know?

You could save c24,000 litres of water every year by installing water butts and using rainwater to water your garden and plants.

Did you know?

Turning off the tap while cleaning your teeth or shaving could save around 12 litres of water each time.

Top Tips:

- Put a full load in your washing machine instead of a half loads. This could save up 80 litres a week.
- A hosepipe can use enough water in 30 minutes to fill five bath tubs. When washing your car use a bucket and sponge to help save water.
- Only boil as much water as you need when filling up a kettle. Saving energy and water

Making these small changes today could save 70,000 litres of water a year!!
